

Description of a Mini-COOL Hybridisation of third places : Digital third places?

Rubric	Text	Comments / questions / remarks
Title / Name	Hybridisation of third places : Digital third places?	
Short Description	Creating frictions between the physical and digital world. The notion of third place has evolved a lot: third places have been closed a lot, have suffered from the COVID 19 health crisis. And at the same time we realise that third places can be in many places. Interview with Sophie Alex Bacquer, International and Innovation Officer at Croix Rouge Compétence Nouvelle Aquitaine (Red Cross, France), conducted on 22 April 2022.

Longer	The COVID-19 health crisis that we experienced, we	
description	were all locked up. We became fully aware at that	
	time how the only way to stay in touch with others	
Links with	was virtual. The virtual has allowed us to meet,	
existing supports	privately and professionally. Digital: means allowing	
/ contents	access to training, contacts, links Digital is the	
/ contents	means allowing resilience in a crisis situation. You	
	have to learn to build new models. Today, we	
Links with	cannot build without digital.	
experience	On the other hand, the notion of "hybrid" is more	
	interesting than "digital" because we realised that	
etc.	contact, human relationship, cannot pass only	
	through the screen.	
	The "digital" has this ease of being "nomadic": it	
	accompanies us everywhere. It is therefore	
	interesting to think about how a physical place can	
	integrate a digital space, and vice versa.	
	This is a project that IRFSS Nouvelle Aquitaine is	
	currently carrying out: HOPE IN US aims to create a	
	digital third place, to know a set of tools that will	
	meet the person regardless of the physical place	
	where the person is.	
	Homes for dependent elderly persons could also	
	increasingly be third places. Welcoming a whole	
	bunch of other audiences, and there, the "virtual"	
	has its place.	
	It's like a current division of work between	
	telework at home and domestic work: whereas	
	when we absolutely wanted to separate them, now	
	we create frictions between the two worlds. This is	
	what the HOPE IN US project wishes to encourage.	
	what the HOFL IN 03 project wishes to encourage.
