

Description of a Mini-COOL Multiple faces of hybridisation

Rubric	Text	Comments / questions / remarks
Title / Name	Multiple facets of hybridisation	
Short Description	Interview with Andrea Ascari, conducted on 25 May 2023.	
Support / format Link	-MP4 based on recorded audio interview -Link (P3T Youtube channel): https://www.youtube.com/watch?v=5ClqaJfluSo&t = - Audio in French, subtitles available in both French and English	
Tags / Keywords	Hybridisation, third places, inclusion, Digital, Physical, multidimensional	
Learning outcomes / audience	- Learning outcomes: Learn what can "digital" bring to places of third type. Learning how to develop and sustain a place-3T through hybridisation - Audience: Third places actors	
Links with the development of the Place-3T Suggestion of situations where it could be of value	Providing reference points, tips and tricks for developing and sustaining 3T places through hybridisation.	
Longer description Links with existing supports / contents	To decode hybridization of third places, this mini-COOL focuses on multiple facets of hybridization. It is based on the interview with Andrea Ascari, conducted on 25 May 2023. Hybridization can be seen as a mixture of different dimensions. It can be seen not only as hybridization between the digital and the physical world, but it	

Links with	also has a professional dimension and skills. Also,	
experience	there is a hybridization of the spaces themselves.	
	We work a lot in networks and therefore we mix	
etc.	different spaces and different activities which can	
	be social, entrepreneurial, projects, prevention	
	activities And, for me, there is also the	
	hybridization of purposes: social purposes,	
	entrepreneurial goals, environmental goals And	
	therefore, we cannot think of hybridization	
	between two subjects, but multifactorial,	
	multi-dimensional hybridization.	
	Third places are a hybridization between the social	
	dimension and the entrepreneurial dimension.	
	Third places are also places where skills meet,	
	not prejudices. And so, I believe that creating	
	places to meet skills, and not prejudices, is really	
	important to create a truly inclusive system. Third	
	places are also neutral places that are constructed	
	and represented according to the actors and the	
	opportunities. Places are also places for young	
	people.	
	Andrea Ascari also mentions interesting examples	
	of hybridization of the spaces on which he has	
	worked.
